Abstracts

The urinalysis market is projected to grow at a CAGR of 7.57% to reach US\$2,444.930 million by 2024, from US\$1,577.972 million in 2018. Urinalysis is the test of urine performed to detect disorders such as urinary tract infections, kidney disease and diabetes. It involves checking the appearance, concentration, odour and content of urine. The primary aim of the urinalysis is to detect health condition and is generally carried out as routine medical check-up, pregnancy check-up, pre-surgery preparation, or on hospital admission to diagnose various disorders. Additional tests are further required to finally diagnose the causes or specific features of core problems. The market is expected to show significant growth during the forecast period. The growth may be attributed to the rising prevalence of the renal disorders and urinary tract infections. Rising adoption of point of care urinalysis devices will also augment the growth of the urinalysis market during the given forecast period. However, stringent regulatory requirements might hamper the growth of the market. Lack of adequate healthcare infrastructure in low-income countries will also restrain the growth of urinalysis market during the given time frame.

The Urinalysis Market – Forecasts from 2019 to 2024 is an exhaustive study that aims to present the key market trends through various chapters focusing on different aspects of the market. The study provides a detailed market overview through the market dynamics sections which detail key market, drivers, restraints, and opportunities in the current market. The report analyzes key opportunity regional markets, and the current technology penetration through lifecycle analysis. The report also analyzes the market through comprehensive market segmentation by type, component, application, end-user, and geography.

The urinalysis has been segmented based on type, component, application, end-user, and geography. By type, the market has been segmented on the basis of biochemical urinalysis and sediment urinalysis. By components, the market has been segmented as

consumables and instruments. By applications, the market has been divided into urinary tract infections, diabetes, liver diseases, pregnancy tests, and others. By end-user, the market has been divided into hospitals and clinics, diagnostic centers, and home care.

Regional analysis has been provided with detailed analysis and forecast for the period 2018 to 2024. The global market has been broken down into North America, South America, Europe, Middle East and Africa (MEA), and the Asia Pacific regions. The report also analyzes 15 countries across these regions with thorough analysis and forecast along with prevailing market trends and opportunities which each of these countries present for the manufacturers.

Major players in the urinalysis market have been covered along with their relative competitive position and strategies. The report also mentions recent deals and investments of different market players over the last year. The company profiles section details the business overview, financial performance for the past three years, key products and services being offered along with the recent developments of these important players in the urinalysis market.
