Abstracts

Global urology devices market is projected to grow at a CAGR of 11.60% to reach US\$48.523 billion by 2024, from US\$25.116 billion in 2018. Urology devices are used to diagnose and treat disorders related to human urinary tract system and reproductive system as well. The continuous advancement in the devices allows physicians to diagnose and treat the urological disorder with greater precision and accuracy. Urology has been one of the major sectors adopting novel medical technologies, such as minimally invasive surgery and robotic surgery, to improve patient outcomes. Continuous technological advancements in the products will also augment the market growth during the given time frame.

The urology devices market is expected to show significant growth during the given forecast period. The growth in the market may be attributed to the rising incidences as well as awareness in regards to the urological disorders such as prostate cancer, chronic pelvic pain syndrome, interstitial cystitis, bladder cancer, kidney stones, etc. among the population. In US alone more than 3 million women are affected by interstitial cystitis/bladder pain syndrome (IC/BPS) and 10% of the adults suffer from daily urinary incontinence. However, high cost of the urology devices coupled with stringent regulatory requirements is expected to restrain the market during the given forecast period.
