Abstracts

The USA antibody-drug conjugates (ADCs) market is expected to grow with a CAGR of 27.51 percent to achieve a market size of USD5,318.400 million by the end of 2024. The antibody-drug conjugate technology provides a promising and effective strategy for targeted cancer treatment, hence promoting market growth during the forecast period in the United States. The Seattle Genetics, which is a biotechnology company headquartered in Bothell, Washington has an antibody-drug conjugate drug named as ADCETRIS®, this has gained approval for treating lymphomas expressing CD30. The company has retained its commercial rights for drug sales in the United States and Canada only. While in collaboration with Takeda Pharmaceutical Company Limited, the company sells ADCETRIS in countries other than the US and Canada. Such joint initiatives by the companies in the country will provide an opportunity for the market to grow in the forecast period and in the coming years with the growing incidences of cancer in the United States and other parts of the world. Furthermore, the United States has the highest health expenditure among the industrialized regions of the world, promoting the growth of the ADC market during the forecast period with the growing innovations in cancer therapy.
