Abstracts

Video doorbell market is projected to grow at a CAGR of 17.54% during the forecast period, reaching a total market size of US\$2.940 billion in 2024 from US\$1.115 billion in 2018. A video doorbell is a device that notifies the homeowner when a visitor arrives at the door. The video doorbells provide enhanced security from theft and crime due to the inclusion of night vision and motion detector sensors in it. It also enables the homeowners to speak and see the visitor without even going to the door. The video doorbell market is growing due to the increasing urbanization and the rising per capita income. Also, the growing internet penetration, rapid adoption of cloud storage technology, and the increasing pace of transition to digitalization are boosting the demand. Furthermore, the increasing demand for smart homes, easy accessibility, convenient installation, and technological advancement is supporting the video doorbell market growth. However, internet connectivity issues and the threat of hacking is a concern for the market.
