Abstracts

The water-based adhesives market is estimated to grow at a CAGR of 2.48% to reach a market value of US\$19.679 billion by 2024, from US\$16.985 billion in 2018. Water-based adhesive is mainly synthesized from the soluble synthetic material and natural polymers. The water-based adhesive use is significantly penetrating the end-user market. They have different characteristics as per the synthesis and use of the end products. Research and development will be an essential factor for the water-based adhesive market. Newer products with lesser cure time, high bond strength and lesser emission can play an essential driver for the market. The synthesizing companies, R&D firms, and end-user manufacturers need to invest for future advancement and technology modification of water-based adhesive industry to match the end-user demands coming from the different sectors. Application of water-based adhesive is mostly in bottle labeling, coating and paper lamination among others. All these agents can forecast a calculable level of growth for the global water-based adhesive market.

The Water-Based Adhesives Market – Forecasts from 2019 to 2024 is an exhaustive study that aims to present the key market trends through various chapters focusing on different aspects of the market. The study provides a detailed market overview through the market dynamics sections which detail key market, drivers, restraints, and opportunities in the current market. The report analyzes key opportunity regional markets, and the current technology penetration through lifecycle analysis. The report also analyzes the market through comprehensive market segmentation by type, production process, application, and geography.

The water-based adhesives market has been segmented based on type, production process, application, and geography. Based on type the market has been segmented into vegetable adhesives, casein adhesives, PVAc adhesives, and latex adhesives. By

the production process, the market has been classified as chemically synthesized and naturally synthesized. By application, the market has been segmented into food and beverage packaging, furniture and building components, travel and transportation/logistics, healthcare, and others.

Regional analysis has been provided with detailed analysis and forecast for the period 2018 to 2024. The global market has been broken down into North America, South America, Europe, Middle East and Africa, and the Asia Pacific regions. The report also analyzes 16 countries across these regions with thorough analysis and forecast along with prevailing market trends and opportunities which each of these countries present for the manufacturers.

Major players in the water-based adhesive market have been covered along with their relative competitive position and strategies. The report also mentions recent deals and investments of different market players over the last year. The company profiles section details the business overview, financial performance for the past three years, key products and services being offered along with the recent developments of these important players in the water-based adhesives market.
