## Abstracts

The Webbing market is projected to grow at a CAGR of 7.25% to reach US\$4.039 billion by 2023, from US\$2.655 billion in 2017. Webbing is a strong fabric which is used in automobile safety belts, slacklining, furniture manufacturing, military apparel, and many other fields. Increasing production in the automobile industry and rising safety concerns are expected to drive the market in the forecast period. Moreover increasing military expenditure and expansion of the industrial sector further propel the demand in the market. However, volatility in the prices of raw materials is considered as the restraining factor for the growth of the market. The Webbing market of the APAC region is expected to witness the rapid growth during the forecast period owing to rapid industrialization and expanding the automotive industry.

This research study examines the current market trends related to the demand, supply, and sales, in addition to the recent developments. Major drivers, restraints, and opportunities have been covered to provide an exhaustive picture of the market. The analysis presents in-depth information regarding the development, trends, and industry policies and regulations implemented in each of the geographical regions. Further, the overall regulatory framework of the market has been exhaustively covered to offer stakeholders a better understanding of the key factors affecting the overall market environment.

Identification of key industry players in the industry and their revenue contribution to the overall business or relevant segment aligned to the study has been covered as a part of competitive intelligence done through extensive secondary research. Various studies and data published by industry associations, analyst reports, investor presentations, press releases and journals among others have been taken into consideration while conducting the secondary research.
