“Gamma Delta T Cell Cancer Therapy Opportunity & Clinical Trials Insight 2026”
Report Highlights:

Commercialization Market Potential After Market Launch: > USD 4 Billion

Insight on Key Drugs In Research & Development

Global Gamma Delta T Cell Cancer Therapy Clinical Trials Insight

Gamma Delta T Cell Cancer Therapy In clinical Trials: > 15 Therapies

Gamma Delta T Cell Cancer Therapy Market Opportunity By Cancer Type

Adopted Approaches for Gamma Delta T Cell Therapy

Over the past few years, the idea of immunotherapy of ability to manipulate immune cells in targeting tumor cells is gaining momentum in field of cancer therapeutics. Since then scientists have developed a wide range of potential candidates which has shown encouraging results in the management of cancer. The recent clinical success of chimeric antigen receptor in the management of hematological malignancies has clearly led to the explosion in the field of adoptive cell therapy for cancer. Researchers are currently putting efforts for the translation of this exciting technology in solid tumors and the development of allogeneic off the shelf therapies.

With the progress in biotechnology researchers were able to identify gamma delta T cells which have potential role in cancer immunosurveillance and have the potential to overcome the challenges in adoptive cell therapy. The cells have both innate and adaptive like properties, thus bridging between the adaptive and innate immunity. Furthermore, these subsets of cells produce different cytokines, chemokine and growth factors which help in generating immune response against the tumor cells.

Since their identification, gamma delta T cells are attractive candidates for the adoptive T cell therapy due to their unique biology and favorable characteristics in the management of cancer. The unique ability of targeting cells in major histocompatibility complex independent manner and recognizing a broader range of antigens has gained a lot of interest by the researchers. As of now, there are no approved gamma delta T therapies but a pool is present in clinical trials. Majority of the candidates belongs to early phase clinical trial which will require about 5-7 years to enter the market.

The encouraging response of the gamma delta T cell therapy in the management of cancer has surged the researchers for the exploiting the role of gamma delta T cells in other diseases also. A number of preclinical studies have been initiated by researchers to identify their role in diabetes, infectious and autoimmune diseases. As per report, it is expected that global gamma T cell therapy will witness huge growth rate in coming years and the market will be flourished with various potential candidates in management of wide range of diseases.

Despite several restraining factors in the growth of market including low physical frequency, high cost of development and stringent regulatory guidelines the overall market will follow a trajectory path. This is mainly due to the rising partnerships and collaborations among the pharmaceutical companies which increases the investment to carry out research and development activities. The major key players operating in the market are Acopedia, Takeda Pharma, TC Biopharma and Adapate Therapeutics which have robust clinical pipeline of gamma delta T cells candidates.

In coming years, the subsequent rise in the prevalence of cancer and the rates at which conventional therapies are failing will possess unmet need for the development of novel therapies which will drive the gamma delta T cell therapy market. Moreover, the exploitation of the therapy in management of other diseases will also propel the growth of marker. In addition to this, it is analyzed that North America will hold the top position in the global market due to rising geriatric population and increase government initiatives to promote novel therapies. In the forecast period, Europe and Asia-Pacific

will also emerge as a potential market due to increase in awareness among the population of the region.

Contents

1. INTRODUCTION TO GAMMA DELTA T CELL THERAPY

- 1.1 Emerging Role of T Cell Based Immunotherapies
- 1.2 Overview to Gamma Delta T Cell Therapy

2. GAMMA DELTA T CELL THERAPY VS. CONVENTIONAL THERAPIES

- 2.1 Gamma Delta T Cell Therapy Vs. CAR T Cell Therapy
- 2.2 Gamma Delta T Cell Therapy Vs. Tumor Infiltrating Lymphocyte Therapy
- 2.3 Gamma Delta T Cell Therapy Vs. Immune Checkpoint Inhibitors
- 2.4 Gamma Delta T Cell Therapy Vs. Monoclonal Antibodies
- 2.5 Gamma Delta T Cell Therapy Vs. Others

3. ROLE OF GAMMA DELTA T CELLS IN CANCER

- 3.1 Gamma Delta T Cells in Cancer Progression
- 3.2 Anti Tumor Activity of Gamma Delta T Cells

4. ADOPTED APPROACHES FOR GAMMA DELTA T CELL THERAPY

- 4.1 Gamma Delta T Cell as Bispecific Antibodies
- 4.2 CAR Gamma Delta T Cells

5. GAMMA DELTA T CELL THERAPY: KEY DRUGS IN RESEARCH & DEVELOPMENT

- 5.1 ADI-001
- 5.2 LAVA-051
- 5.3 INB-200
- 5.4 TCB002
- 5.5 INB-100
- 5.6 ACE1831
- 5.7 GDX012

6. GLOBAL GAMMA DELTA T CELL CANCER THERAPY CLINICAL PIPELINE OVERVIEW

- 6.1 By Country
- 6.2 By Company
- 6.3 By Indication
- 6.4 By Phase

7. GLOBAL GAMMA DELTA T CELL CANCER THERAPY CLINICAL TRIALS INSIGHT

- 7.1 Research
- 7.2 Preclinical
- 7.3 Phase-I
- 7.4 Phase-II/III

8. GAMMA DELTA T CELL THERAPY IN LEUKEMIA

- 8.1 Role of Gamma Delta T Cells in Leukemia
- 8.2 Ongoing Clinical Research in Acute Leukemia
- 8.3 Clinical Trials in Chronic Lymphocytic Leukemia
- 8.4 Future Market Opportunity of Gamma Delta T Cells in Leukemia

9. GAMMA DELTA T CELL THERAPY IN LUNG CANCER

- 9.1 Overview
- 9.2 Ongoing Research & Development
- 9.3 Future Market Opportunity of Gamma Delta T Cell Therapy in Lung Cancer

10. GAMMA DELTA T CELLS IN BREAST CANCER

- 10.1 Overview
- 10.2 Ongoing Research & Development in Breast Cancer
- 10.3 Future Market Opportunity of Gamma Delta T Cell Therapy in Breast Cancer

11. GAMMA DELTA T CELLS IN COLORECTAL CANCER

- 11.1 Function of Gamma Delta T Cells in Colorectal Cancer
- 11.2 Ongoing Clinical Trials in Colorectal Cancer
- 11.3 Future Market Potential of Gamma Delta T Cell Therapy in Colorectal Cancer

12. GAMMA DELTA T CELLS IN PANCREATIC CANCER

12.1 Overview

12.2 Ongoing Research & Development in Pancreatic Cancer

12.3 Future Market Potential of Gamma Delta Therapy in Pancreatic Cancer

13. Current Clinical Research in Other Cancers

13.1 ONGOING CLINICAL TRIALS IN NEUROBLASTOMA

13.2 Ongoing Clinical Trials in Glioblastoma

13.3 Ongoing Research & Development in Head & Neck Cancer

14. GAMMA DELTA T CELL THERAPY MARKET OVERVIEW

14.1 Current Market Scenario

14.2 Market Potential of Gamma Delta T Cell Therapy Market

15. GAMMA DELTA T CELL THERAPY MARKET DYNAMICS

15.1 Gamma Delta T Cell Therapy Market: Favorable Parameters

15.2 Gamma Delta T Cell Therapy Market: Challenges

16. GAMMA DELTA T CELL THERAPY FUTURE PROSPECTS

17. COMPETITIVE LANDSCAPE

17.1 Acepodia

17.2 Adaptate Therapeutics

17.3 Adicet

17.4 Cytomed Therapeutics

17.5 Gadeta

17.6 GammaDelta Therapeutics

17.7 IN8bio

17.8 Kiromic Biopharma

17.9 Lava Therapeutics

17.10 Takeda Pharmaceuticals

17.11 TC Biopharm
