

# Global Cancer Kinase Inhibitors Market & Pipeline Insight

<https://marketpublishers.com/r/G2DE9F924B9EN.html>

Date: October 2014

Pages: 1500

Price: US\$ 2,400.00 (Single User License)

ID: G2DE9F924B9EN

## Abstracts

**Please note: extra shipping charges are applied when purchasing Hard Copy License depending on the location.**

The recent years have witnessed the emergence of kinase inhibitors, which have the potential to offer less toxic and more efficient therapeutic alternatives for patients. Over the past two decades, the researchers have increased their learning about the functioning of these inhibitors, which has led to the achievement of significant milestones of development during this period. The use of inhibitors for treating cancer is gradually increasing. The rising market availability of these agents has enabled the pharmaceutical companies to develop novel combination approaches which have the capability to provide even greater insight into the body's acceptance of inhibitors so as to develop more efficient drugs.

The field of cancer is growing mainly because of the globally aging population, increasing rates of obesity and rising smoking rates across all regions. This opens the door of opportunities for the drug makers globally because the kinase inhibitors is highly competitive and is currently in growing stages, thus offering significant areas of unmet medical need. The future years are likely to witness significantly increased levels of activity in the development of these drugs.

Additionally, with the industry undergoing the period of "patent cliff", the pharma companies are rapidly working towards filling up their exhausting pipelines with alternative and innovative drugs. Kinase inhibitors fit these spaces most appropriately, which is likely to drive future growth and improve the survival rates of cancer patients.

A significant amount of research is being carried out currently to improve the level of potency of the already developed kinase inhibitors. Consequently, a relatively new

approach has been indentified in which the precision of targeting molecules would be combined with the proved killing power of radiation or cytotoxic chemotherapy which is referred to as payload to precise molecular carriers. However, still a lot of work needs to be done in this arena.

It is expected that during the next decade, with the discovery and introduction of new tumor-specific proteins, newer kinase inhibitor drugs targets would be successfully identified for regulating tumor cell growth. Additionally, the innovations and dynamics in inhibitors would also allow for more efficient cytotoxic kinase inhibitor drug targeting or lead to more efficient activation of host effector mechanisms which tend to lead to better therapeutic targets.

### **“Global Cancer Kinase Inhibitors Market & Pipeline Insight” Report Highlight:**

Classification & Mechanism of Kinase Inhibitors

Cancer Kinase Inhibitors Therapy Market Overview

Cancer Kinase Inhibitors Therapy Pipeline by Phase, Indication, Company & Country

Marketed Cancer Kinase Inhibitors Therapy by Indication, Company & Country

Patent Analysis & Orphan Designation of Kinase Inhibitors

Cancer Kinase Inhibitors In Clinical Pipeline: 649 Drugs

Marketed Cancer Kinase Inhibitors: 35 Drugs

## Contents

### **1. INTRODUCTION TO KINASE INHIBITORS**

- 1.1 Cancer Growth Blockers
- 1.2 Types of Cancer Growth Blockers
- 1.3 Tyrosine Kinase Inhibitors

### **2. KINASE INHIBITORS CLASSIFICATION**

- 2.1 Type I Kinase Inhibitors
- 2.2 Type II Kinase Inhibitors
- 2.3 Type III Kinase Inhibitors
- 2.4 Type IV Kinase Inhibitors or Substrate Directed Inhibitors
- 2.5 Covalent Inhibitors

### **3. MECHANISMS OF KINASE INHIBITORS**

- 3.1 Biochemical Mechanism of Action of Tyrosine Kinase
- 3.2 Oncogenic Activation of Tyrosine Kinase
  - 3.2.1 Activation by Mutation
  - 3.2.2 BCR-ABL and Human Leukemia
  - 3.2.3 TEL-ABL and Human Leukemia
  - 3.2.4 Autocrine-Paracrine Loops
  - 3.2.5 EGFR in Autocrine Paracrine Loops
  - 3.2.6 PDGFR in Autocrine Paracrine Loop
  - 3.2.7 Insulin like Growth Factor Receptors in Autocrine Growth Loop
- 3.3 Tyrosine Kinases as Targets for Anticancer Agents

### **4. NEED FOR CANCER KINASE INHIBITOR THERAPY**

### **5. CANCER KINASE INHIBITORS THERAPY MARKET OVERVIEW**

- 5.1 Current Market Scenario
- 5.2 Cancer Kinase Inhibitors Pipeline Overview

### **6. CANCER KINASE INHIBITORS THERAPY MARKET DYNAMICS**

- 6.1 Favorable Parameters

## 6.2 Growth Restraints

## **7. CANCER KINASE INHIBITORS THERAPY MARKET FUTURE OUTLOOK**

## **8. CANCER KINASE INHIBITORS THERAPY PIPELINE BY PHASE, INDICATION, COMPANY & COUNTRY**

8.1 Phase: Unknown

8.2 Phase: Research

8.3 Phase: Preclinical

8.4 Phase: Clinical

8.5 Phase-I

8.6 Phase-I/II

8.7 Phase-II

8.8 Phase-II/III

8.9 Phase-III

8.10 Preregistration

8.11 Registered

## **9. MARKETED CANCER KINASE INHIBITORS THERAPY BY INDICATION, COMPANY & COUNTRY**

## **10. SUSPENDED & DISCONTINUED IN CANCER KINASE INHIBITORS THERAPY PIPELINE**

10.1 No Development Reported

10.2 Discontinued

10.3 Suspended

## **11. COMPETITIVE LANDSCAPE**

11.1 Amgen

11.2 AstraZeneca

11.3 AVEO Pharmaceuticals

11.4 Bayer HealthCare Pharmaceuticals

11.5 Boehringer Ingelheim

11.6 Deciphera Pharmaceuticals

11.7 Genentech

11.8 GlaxoSmithKline

11.9 Incyte Corporation

11.10 Novartis

11.11 Pfizer

11.12 Takeda

## List Of Figures

### LIST OF FIGURES

Figure 2-1: Kinase Inhibitors Classification

Figure 3-1: Mechanisms of Constitutive Activation of Kinase Inhibitors

Figure 5-1: Global Market for Kinase Inhibitors (US\$ Billion), 2013-2020

Figure 5-2: Global Market for Cancer Kinase Inhibitors (US\$ Billion), 2013-2020

Figure 5-3: Regional Break-Up for Kinase Inhibitors Market (%), 2013 & 2020

Figure 5-4: Cancer Kinase Inhibitors Pipeline by Phase (%), 2014

Figure 5-5: Cancer Kinase Inhibitors Pipeline by Phase (%), 2014

Figure 5-6: No Development Reported in Cancer Kinase Inhibitors Pipeline by Phase (%), 2014

Figure 5-7: No Development Reported in Cancer Kinase Inhibitors Pipeline by Phase (Number), 2014

Figure 5-8: Discontinued Cancer Kinase Inhibitors Pipeline by Phase (%), 2014

Figure 5-9: Discontinued Cancer Kinase Inhibitors Pipeline by Phase (Number), 2014

Figure 5-10: Suspended Cancer Kinase Inhibitors Pipeline by Phase (%), 2014

Figure 5-11: Suspended Cancer Kinase Inhibitors Pipeline by Phase (Number), 2014
