"Global KRAS Inhibitors Market Opportunity & Clinical Trials Outlook 2025" Report Highlights:

KRAS Inhibitors Market Opportunity: > USD 1 Billion by 2025

Initially US To Dominate KRAS Inhibitors Market: >90% Market Share

Number of KRAS Inhibitors In Trials: > 20 Drugs

Highest Phase of Clinical Development: Phase-III Study

Solid Tumors Targeted Drugs Dominating The Clinical Trials

Global KRAS Inhibitors Market Trends & Dynamics

Global KRAS Inhibitors Market Future Opportunity Outlook

The accelerating pace of the cancer cases at global level has led to the arrival of a unique and application-based therapy market, known as KRAS inhibitors. In the past few years, the therapy has been able to show favorable response involving the cell cycle, which is the ultimate target of the cancer cells for continue its proliferation and division in the patients. A cluster of innovative drugs that target KRAS protein has been developed by the researchers and bunch of novel product candidate targeting KRAS

protein is currently active in the clinical trials. It can be stated for KRAS inhibitors that it is among the top emerging sectors of the cancer therapeutics market which is due to the splendid research and development pipeline associated with the market. The entire market associated with KRAS inhibitors, in a very short period of time has been able to shift the entire cancer landscape, thus resulting in the standard care of cancer treatment with appropriate opportunities to the patients and the investors.

The drugs developed under the market, inhibits KRAS protein and further the important signaling pathways, ultimately leading to the cell cycle arrest and killing of the cancer cells. Such switching on and off of the cell cycle with the help of hundreds of KRAS inhibitors developed by the researchers is estimated to improve the overall paradigm for efficient targeting, minimal side-effect development, increased effectiveness and efficiency against different types of tumor antigens. The overall increase in the spending for research-based formulas for KRAS inhibitors is also estimated to develop a market that is worth trillions of dollars and decrease the burden that is getting reflected in the cancer therapeutics market with respect to efficient targeting of the cancer cells.

Despite having numerous challenges which were set by the already driven cancer therapies in the market such as chemotherapy or radiation therapy, the novel KRAS inhibitor market has made its impact on the overall running paradigm of cancer therapeutics at global level. The pharmaceutical research sector affiliated with KRAS inhibitor market has weathered down the complex challenges of developing drug candidates with 100% efficacy.

Now-a-days, the KRAS inhibitor market at global level is getting adjoined with novel techniques and technologies that are apparently leading to reinventing the entire cancer market and research-based sector. No doubt, the entire market has led to an opening of novel frontiers that could unravel the complex mechanism of cancer cells and how it could get regulated by controlling the proteins responsible for cell cycle. In addition to this, some of the parameters that are leading to the exponential growth of the market in the past few years include: healthcare benefits associated with the drug candidates and increased awareness about the side-effects of old and traditional cancer therapies such as chemotherapy.

As per the "Global KRAS Inhibitors Market Opportunity & Clinical Trials Outlook 2025" report findings, it can be estimated that the market is completely getting catalyzed by the increased applications of healthcare benefits and variety of disruptive technologies and drug candidates that are available in the market for different types of tumor antigens. In the novel cancer therapeutics market, partly driven by KRAS inhibitor is

believed to be overcoming all the challenges that were difficult to crack before the arrival of the KRAS inhibitor therapy.

Contents

1. INTRODUCTION TO KRAS INHIBITORS

- 1.1 Overview
- 1.2 Evolution of KRAS Inhibitors

2. ROLE OF KRAS INHIBITORS IN CANCER

3. KRAS INHIBITORS - MODE OF ACTION

4. KRAS INHIBITORS FOR TARGETING LUNG CANCER

- 4.1 Impact of KRAS Inhibitors on Lung Cancer
- 4.2 Ongoing Research & Development
 - 4.2.1 AMG 510 (Sotorasib)
 - 4.2.2 MRTX849 (Adagrasib)
 - 4.2.3 Other Investigational KRAS Inhibitors for Lung Cancer

5. KRAS INHIBITORS IN PANCREATIC CANCER

- 5.1 Role of KRAS Inhibitors in Pancreatic Cancer
- 5.2 Recent Advancement in Pancreatic Cancer Targeting KRAS Inhibitors

6. KRAS INHIBITORS FOR COLORECTAL CANCER

- 6.1 Potential of KRAS Inhibitors Against Colorectal Cancer
- 6.2 Ongoing Research & Development

7. KRAS INHIBITORS FOR OTHER CANCERS

- 7.1 Potential of KRAS Inhibitors as Hematological Cancer Therapeutics
- 7.2 KRAS inhibitors in Prostate Cancer
- 7.3 KRAS Inhibitors for Gastric Cancer
- 7.4 KRAS Inhibition in Endometrium Cancer
- 7.5 Role of KRAS Inhibitors in Brain Cancer

8. GLOBAL KRAS PROTEIN INHIBITORS CLINICAL TRIALS INDICATORS

- 8.1 By Phase
- 8.2 By Country
- 8.3 By Company
- 8.4 By Indication
- 8.5 By Patient Segment

9. GLOBAL KRAS PROTEIN INHIBITORS CLINICAL PIPELINE BY COMPANY, INDICATION & PHASE

- 9.1 Research
- 9.2 Preclinical
- 9.3 Phase-I
- 9.4 Phase-I/II
- 9.5 Phase-II
- 9.6 Phase-III

10. GLOBAL KRAS INHIBITORS MARKET ANALYSIS: CURRENT SCENARIO

11. GLOBAL KRAS INHIBITORS MARKET TRENDS

- 11.1 Revolution Medicines' KRAS-G12(ON) Inhibitor Shows Prominent Anti-Tumor Activity
- 11.2 Boehringer Ingelheim & Mirati Therapeutics Collaborated to Study Combinational KRAS Inhibitor Therapy
- 11.3 Merck Signed a Licensing Deal with Taiho & Astex for Developing KRAS Targeting Therapies
- 11.4 Strata Collaborated with Mirati Therapeutics for Conducting Trial of MRTX849
- 11.5 Revolution Medicine Collaborated with Amgen to Evaluate SHP2 & KRAS Inhibitors Combinational Therapy
- 11.6 Oncogenity – New Player in KRAS Inhibitor Development
- 11.7 Miratis & Novartis Collaborated to Assess KRAS Inhibitor Based Combinational Therapy

12. GLOBAL KRAS INHIBITORS MARKET DYNAMICS

- 12.1 Driving Factors for KRAS Inhibitor Market
- 12.2 Challenges for KRAS Inhibitors Market

13. GLOBAL KRAS INHIBITORS MARKET FUTURE OPPORTUNITY OUTLOOK

14. COMPETITIVE LANDSCAPE

- 14.1 Amgen
- 14.2 Mirati Therapeutics
- 14.3 Revolution Medicines
- 14.4 Boehringer Ingelheim
- 14.5 Merck
- 14.6 Moderna
- 14.7 Silenseed
- 14.8 Johnson & Johnson
- 14.9 Eli Lilly
- 14.10 Oblique Therapeutics
- 14.11 Cotinga Pharmaceuticals
- 14.12 Codiak Biosciences
- 14.13 Gilead

COMPANIES MENTIONED

Amgen

Mirati Therapeutics

Revolution Medicines

Boehringer Ingelheim

Merck

Moderna

Silenseed

Johnson & Johnson

Eli Lilly
Oblique Therapeutics
Cotinga Pharmaceuticals
Codiak Biosciences
Gilead
