Competitor Analysis: Bispecific Antibodies for Cancer, Inflammatory Other Diseases

This Competitive Intelligence report about Bispecific Antibodies for Cancer, Inflammatory Other Diseases evaluates the competitive landscape of bispecific therapeutic antibodies for treatment of cancer, anti-inflammatory autoimmune diseases as well as cardiometabolic, infectious, neurologic, ophthalmic and pulmonary diseases as of June 2016. Purchase of the downloadable pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

Tremendous progress in bispecific antibody technologies during the last decade has lead to an explosion of the number of bispecific antibodies in clinical development. This report describes 47 clinical and further 25 pre-IND stage bispecific antibodies in addition to numerous preclinical RD programs. The two specificities provide flexibility in the use as:

T-Cell or NK cell redirecting bispecific cancer antibodies

Bispecific immuno-oncology antibodies

Bispecific tumor antigens targeted cancer antibodies

Bispecific antibodies for inflammatory autoimmune diseases

Bispecific antibodies for cardiometabolic, infectious, neurologic, ophthalmic or

pulmonary diseases

The report includes a compilation of currently active projects in development of bispecific therapeutic antibodies including cocktails of antibodies as well as oligo- and polyclonal antibodies. In addition, the report lists company-specific RD pipelines of EGF-R antibodies. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

RD Stage and

additional comments with a hyperlink leading to the source of information.

About Competitor Analysis Series:

The Competitor Analysis Series delivers NO-FRILLS, but concise information about the pipeline of RD projects for targets, diseases, technologies and companies at low prices. The information is provided in a tabular format and fully referenced.

Contents

1. Bispecific Antibodies for Cancer, Inflammatory Other Diseases

T-Cell Redirecting Bispecific Cancer Antibodies

NK Cell Redirecting Bispecific Cancer Antibodies

Bispecific Immuno-Oncology Antibodies

Bispecific Tumor Antigens Targeted Cancer Antibodies

Bispecific Antibodies for Inflammatory Autoimmune Diseases

Bispecific Antibodies Outside Oncology Inflammation

Antibody Cocktails Oligo- and Polyclonal Antibodies

2. Corporate Bispecific Antibody Pipelines
