Product description

The Competitive Intelligence Report Interferon as of April 2014 provides a competitor analysis in the product portfolios and development pipelines of novel recombinant and natural interferon alpha, beta, gamma, lambda and of other subtypes for treatment of hepatitis B and C, other infectious diseases, cancer and multiple sclerosis, respectively. Purchase of the pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

The report provides information on the marketed interferon preparations and includes a compilation of current active projects in research and development of novel interferon products including novel presentation or delivery formats. In addition, the report lists company-specific product portfolios and R&D pipelines of interferon products and projects. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

R&D Stage and

additional comments with a hyperlink leading to the source of information.

About Competitor Analysis Series:

The Competitor Analysis Series delivers NO-FRILLS, but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies at low prices. The information is provided in a tabular format and fully referenced.
