Competitor Analysis: Survivin-Targeted Immunotherapy

This Competitive Intelligence report analyzes the competitive field of Survivin-Targeted Immunotherapies as of May 2018 in a tabulated format with structured listings of industry-relevant data.

The intracellular protein Survivin is the smallest member of the Inhibitor of apoptosis (IAP) family of proteins, involved in inhibition of apoptosis and regulation of cell cycle. These functional attributes make Survivin an unique protein exhibiting divergent functions i.e. regulating cell proliferation and cell death. Expression pattern of Survivin is also distinctive; it is prominently expressed during embryonal development, absent in most normal, terminally differentiated tissues but upregulated in a variety of human cancers. Expression of Survivin in tumours correlates with not only inhibition of apoptosis and a decreased rate of cell death, but also resistance to chemotherapy and aggressiveness of tumours. Therefore, Survivin is an important target for cancer vaccines and cellular therapeutics. Survivin peptide sequences have been used to develop vaccination strategies and adoptive cell therapies.

The report includes a compilation of currently active projects in research and development of active immunotherapy and adoptive cell therapy targeting Survivin. In addition, the report lists company- and institution-specific R&D pipelines of Survivin-Targeted Immunotherapies. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target/Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

R&D Stage and

additional comments with a hyperlink leading to the source of information.

About Competitor Analysis Series:

The Competitor Analysis Series delivers NO-FRILLS, but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies at low prices. The information is provided in a tabular format and fully referenced.

Contents

1) SURVIVIN-TARGETED IMMUNOTHERAPY

Survivin-Selective Cancer Vaccines

Survivin-Specific, Multi-Antigen Cancer Vaccines

Survivin-Selective Adoptive T-Cell Therapy & Oncolytic Viral Immunotherapy

Survivin-Specific, Multi-Target Adoptive T-Cell Therapy

2) CORPORATE SURVIVIN IMMUNOTHERAPY R&D PIPELINES
