## Abstracts

### Product description

The present Competitive Intelligence Report about Anti-Infective Antibodies provides a competitor evaluation in the field of recombinant monoclonal and polyclonal antibodies and human plasma-derived immunoglobulins and hyperimmunes for post-exposure prophylaxis and treatment of infectious diseases as of November 2011. Purchase of the downloadable pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

The emergence of antibiotic resistant microorganisms, lethal viruses and the threat of engineered microorganism have newly stimulated the interest in recombinant antibodies for infectious diseases. Advances in understanding pathogenetic mechanisms and new antibody technologies have further contributed to a growing class of anti-infective antibodies. Apart from recombinant mono- or polyclonal antibodies, human plasma-derived immunoglobulins have their place in the treatment of immunodeficiencies and specific immunoglobulins (hyperimmunes) are part of standard protocols in post-exposure prophylaxis of a number of infectious diseases. Modern plasma-derived immunoglobulins are characterized by improved purification procedures, more convenience (room temperature stable, ready-to-use preparations, new stabilizers, higher concentrated) and new developments.

The report includes a compilation of product portfolios and current active projects in research and development of anti-infective antibodies and immunoglobulins. In addition, the report lists company-specific R&D pipelines product portfolios anti-infective antibodies, immunoglobulins and hyperimmunes. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

R&D Stage and

additional comments with a hyperlink leading to the source of information.

### **About Competitor Analysis Series:**

The Competitor Analysis Series delivers NO-FRILLS, but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies at low prices. The information is provided in a tabular format and fully referenced.

## Contents

### **RECOMBINANT ANTIBODIES FOR VIRAL DISEASES**

Respiratory Syncytial Virus (RSV)  
Human Immune Deficiency Virus (HIV)  
Hepatitis C Virus (HCV)  
Rabies Virus  
Influenza Virus  
Herpes Simplex Virus  
Hemorrhagic Fever Viruses  
Cytomegalovirus (CMV)  
Various Viruses  
Unspecified Virus, Broad Spectrum Antiviral Antibodies

### **RECOMBINANT ANTIBODIES FOR BACTERIAL DISEASES**

Bacillus Anthracis  
Staphylococci  
Pseudomonas  
Streptococci  
Clostridium Difficile  
Clostridium Botulinum  
Various Bacteria  
Unspecified Bacteria, Broad Spectrum Antibacterial Antibodies

### **RECOMBINANT ANTIBODIES FOR PARASITIC DISEASES**

### **HUMAN PLASMA-DERIVED IMMUNOGLOBULINS**

Conventional Intravenous Immunoglobulins (IVIG)  
Enriched Immunoglobulins  
Injectable SC/IM Immunoglobulins  
Oral Immunoglobulins

### **SPECIFIC IMMUNOGLOBULINS (HYPERIMMUNES)**

Varicella Zoster Immunoglobulins (VZIG)  
Tetanus Immunoglobulins

Rabies Immunoglobulins  
Hepatitis B Immunoglobulins  
Hepatitis A Immunoglobulins  
Cytomegalovirus Immunoglobulins  
Vaccinia Immunoglobulins  
Various Immunoglobulins

## **CORPORATE ANTI-INFECTIVE ANTIBODY PORTFOLIOS AND R&D PIPELINES**

## I would like to order

Product name: Competitor Analysis: Anti-Infective Antibodies

Product link: <https://marketpublishers.com/r/C0A363B079DEN.html>

Price: US\$ 1,086.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
