Abstracts

Product description

The Competitive Intelligence Report Insulin as of January 2011 provides a competitor analysis in the development pipeline of novel insulin-based products for treatment of type 1 and 2 diabetes.

Purchase of the downloadable pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

The report includes a compilation of current active projects in research and development of novel insulin-based products. In addition, the report lists company-specific product portfolios and R&D pipelines of insulin, insulin analogs and new delivery forms of insulin on the market or in R&D. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,
