Competitor Analysis: Respiratory Syncytial Virus (RSV) Vaccines and Therapeutics

The present **Competitive Intelligence Report** about RSV Vaccines & Therapeutics provides a competitor evaluation in the field of prophylactic vaccines and therapeutic antibodies, small molecules and RNAi against infection with respiratory syncytial virus (RSV) as of June 2012. Purchase of the downloadable pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

Respiratory syncytial virus (RSV) infection, which manifests primarily as bronchiolitis and/or viral pneumonia, is the leading cause of lower respiratory tract infection in infants and young children. In the US, RSV LRT infection develops annually in 4-5 million children, and more than 125,000 children are admitted per year for RSV-related illness. RSV disease is the no.1 cause of hospitalization in babies under a year of age in the US. While a monoclonal antibody is commercially available to help prevent RSV disease in infants and children at high risk for severe lung disease from RSV, a RSV vaccine still is not on the market. A number of RSV vaccine candidates have entered clinical development and further are to follow. Also, next generation antibodies against RSV with improved features are in the development pipeline as well as new therapies based on silencing RSV RNA or inhibiting key targets of the virus.

The report includes a compilation of currently active projects in development of vaccines, antibodies, small molecules and small interfering RNA (siRNA) targeting respiratory syncytial virus for prophylaxis and treatment of RSV infections. In addition, the report lists company-specific R&D pipelines of RSV Vaccines & Therapeutics. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

R&D Stage and

additional comments with a hyperlink leading to the source of information.

About Competitor Analysis Series:

The Competitor Analysis Series delivers **NO-FRILLS**, but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies **at low prices**. The information is provided in a tabular format and fully referenced.
