Abstracts

Product description

The present Competitive Intelligence Report about tissue growth factors provides a competitor evaluation in the field of molecules such as proteins, peptides, antibodies, DNA, RNA, cells and small molecules directly or indirectly stimulating tissue growth as of December 2009. Purchase of the downloadable pdf report includes a 6-month online access to the data of the report and any updates since the publication date. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

The classical tissue factors typically are proteins used for tissue repair and growth stimulation. Among the approved products are the growth factors PDGF, IGF, EGF, BMP and FGF. One of the commercially most successful growth factors is BMP-2 from Medtronic and Pfizer (ex Wyeth) with annual sales of nearly US\$ 800 mln and prospect for further growth by use in additional indications. Growth factors are used for treatment of growth failure, skin wounds and ulcers, corneal damage, oral mucositis or to stimulate bone growth. Further growth factors such as HGF, VEGF, TGF, NGF, GDF and quite a number of neurotrophic factors are under development. Apart from proteins as the classical drugs, other classes of compounds are also under development such as small molecules to stimulate growth factor receptors or antibodies to block inhibitory pathways, thereby inducing functional recovery. Furthermore, engineered peptides mimicking growth factors, cells engineered to express growth factors or simply plasmids for growth factors are under development.

The report includes a compilation of currently active projects in research and development of proteins, peptides, antibodies, DNA, RNA, cells and small molecules

directly or indirectly stimulating tissue growth and repair. Competitor projects are listed in a tabular format providing information on:

Drug Codes,

Target / Mechanism of Action,

Class of Compound,

Company,

Product Category,

Indication,

R&D Stage and

additional comments with a hyperlink leading to the source of information.

Index

Hepatocyte Growth Factor (HGF) / Scatter Factor (SF)

Insulin-like Growth Factor (IGF)

Vascular Endothelial Growth Factor (VEGF)

Epidermal Growth Factor (EGF)

Platelet-Derived Growth Factor (PDGF)

Fibroblast Growth Factor (FGF)

Transforming Growth Factor (TGF)

Growth Factors for Bone, Dental, Cartilage and Tendon Repair

Nerve Growth Factor (NGF)

Neurotrophic Growth Factors

Various Other Growth Factors

About La Merie

Companies mentioned in the report are:

Accelaron

Acologix

Acorda Therapeutics

ActoGeniX

Advitech

Alizyme

Alnylam Pharmaceuticals

Alseres Pharmaceuticals

Ambrx

Amgen

AnGes MG

Angion Biomedica

ARCA biopharma

Argenta Biotechnologies

Ark Therapeutics

ArmaGen Technologies

Astellas Pharma

Asterion

Auckland Uniservices

Baxter

Beijing SL Pharmaceuticals

Bharat Biotech

Bioactive Bone Substitutes (BBS)

Biogen Idec

Biopharm

BioMimetic Therapeutics

Bio-Sidus

Biosurface Engineering Technologies

Biovitrum

Bone Biologics

Bonenta

BrainStorm Cell Therapeutics

C3 Jian

Capstone Therapeutics

CardioVascular BioTherapeutics

Cardium Therapeutics

Celgene

NeNeRx Biopharma

CeraPedics

Ceregene

Cytomedix

Daewoong Pharmaceutical Co.

Daiichi Sankyo

DePuy Spine

Dompé

Dr. Reddy's Laboratories

Edward Life Sciences

Eli Lilly

ENKAM

Gene Vector Laboratory

Genzyme

GI Company

GlaxoSmithKline (GSK)

Immuron

Insmed

Ipsen

Johnson & Johnson (Ortho-McNeil Pharmaceuticals)

Kaken Pharmaceutical Co

Kirin (Kyowa Hakko Kirin Pharma)

Kolon Life Sciences

Krenitsky Pharmaceuticals

Kringle Pharmaceuticals

Kuros Biosurgery

Lay Line Genomics

Lupin Pharmaceuticals

Maruho

Medtronic

Merck & Co

Merck Serono

Metabolic Pharmaceuticals

Mitsubishi Tanabe Pharma

Neuren Pharmaceuticals

Neurobiological Technologies

NeuroNova

Neurosearch

Neurotech

Nobel Biocare

NsGene

Osteohealth

Oxford Biomedica

Oy Lx Therapies

Pfizer (Wyeth)

Phage Biotechnology

Phytopharm

Renovo

Roche

Sangamo Biosciences

Sanofi-Aventis

Scil Proteins

Scil Technology

Shire

Sinobiomed

Spectrum Pharmaceuticals

Stem Cell Therapeutics

Taisho Toyama Pharmaceutical Co

Takeda Pharmaceutical Co

Teva Pharmaceutical Industries (CoGenesys)

TissueGene

ToolGen

Tornier

Transition Therapeutics

Trillium Therapeutics

Tripep

Trophogen

UCB

Uni-Bio Science Group

USV

Vical

ViroMed

Zelos Therapeutics

Zymogenetics

About Competitor Analysis Series

The Competitor Analysis Series delivers **NO-FRILLS** , but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies **at low prices**. The information is provided in a tabular format and fully referenced. Competitor analysis reports can be purchased as individual products or obtained by subscribing to **R&D Pipeline News**. R&D Pipeline News is published weekly 50-times a year and each issue contains at least two competitor evaluations.
