Peptide Therapeutics Pipeline Database: 1-Year Subscription

Subscription to La Merie Publishing's proprietary Peptide Therapeutics Pipeline Database provides online access to Peptide Therapeutics on the market and in research & development. The peptide segment database contains about 900 files.

Each project (file) is specified for its Target or Mechanism of Action, Therapeutic Area and R&D Phase. Use of the R&D database of therapeutic peptides is intuitive. Data sets of interest can be printed and exported in Word or Excel format. Projects are being updated continuously by passive and active searches. Information from press releases is entered on a daily basis. Active searches for targets, indications, company pipelines, scientific congresses, corporate releases, publications and in other sources are conducted on a rotating, regular basis.

The R&D history of each project with online references of information sources can be viewed and printed. The projects can be segmented into Territories, Therapeutic Areas and R&D Phases. A scroll down menu for predefined targets and therapeutic areas (e.g. Anti-Inflammatory Peptides) conveniently selects projects of interest:

Anti-Infective Peptides

Anti-Inflammatory Peptides

Cardiovascular Peptides

Cardiometabolic Peptides

Cancer Peptides

GLP-1 Receptor Agonists (only peptides)

PTH Receptor Agonists (only peptides)

Peptides Sales in 2013

An advanced search function allows to combine search parameters. By clicking on column heads of the project list, projects can be arranged in ascending or descending alphabetical or numerical order, e.g. for phase, therapeutic area or company name. Sample screenshots illustrate the database.

Prerequisite: Internet access

Purchase of the subscription provides a 1-year online access to the data of the Peptide Therapeutics Pipeline Database. Credentials to access the database will be sent by e-mail within 24 hours after purchase.

Benefits from the Therapeutic Peptide Pipeline Database:

Intuitive use

24/7 online access to database via internet

Designed for structured searches

Focused on targets, therapeutic areas and R&D phases

Ideal for competitor analysis (companies, targets, therapeutic areas)

Cost-effective and rapid solution for benchmarking

Identification of licensing candidates

2013 sales figures of major peptide therapeutics

Project listing in a tabular format:

Drug Codes

Target / Mechanism of Action

Class of Compound

Product Category

Company

Territory

Therapeutic Area

Indication

R&D Phase

Therapeutic Areas:

Cardiovascular & blood

Dermatology

Gastrointestinal

Genitourinary, renal & gynecology

Infectious & toxicology

Metabolism & endocrine

Neurology & psychiatry

Oncology

Ophthalmology & otorhinolaryngology

Orthopedics, dental, anesthesia & surgery

Pulmonary & respiratory

Rheumatoid & autoimmune
