Abstracts

Product description

Subscription to La Merie's proprietary Therapeutic Protein Pipeline Database provides online access to more than 1,700 project entries for therapeutic proteins on the market and in research & development. Each project is specified for its Target or Mechanism of Action, Therapeutic Area and R&D Phase. Use of the R&D database of therapeutic proteins is intuitive. Data sets of interest can be printed and exported. Projects are being updated continuously by passive and active searches. Information from press releases is entered on a daily basis. Active searches for targets, indications, company pipelines, scientific congresses, corporate releases, publications and in other sources is conducted on a rotating, regular basis. The R&D history of each project with online references of information sources can be viewed and printed. Sales figures of major products are provided. The projects can be segmented into Territories, Therapeutic Areas and R&D Phases. An advanced search function allows to combine search parameters. A scroll down menu for predefined targets conveniently selects projects of interest. By clicking on column heads of the project list, projects can be arranged in ascending or descending alphabetical or numerical order, e.g. for phase, product category or company name. Sample screenshots illustrate the database.

Purchase of the subscription provides a 1-year online access to the data of the Therapeutic Protein Pipeline Database. Credentials to access the database will be sent by e-mail within 24 hours after purchase.

Benefits from the Therapeutic Protein Pipeline Database:

New database with no historical burden

Intuitive use

Designed for structured searches

Focused on targets, therapeutic areas and R&D phases

Ideal for competitor analysis (companies, targets, product categories)

Cost-effective and rapid solution for benchmarking

Identification of licensing candidates

Project listing in a tabular format:

Drug Codes

Target / Mechanism of Action

Class of Compound

Product Category

Company

Territory

Therapeutic Area

Indication

R&D Phase

Therapeutic Areas:

Cardiovascular & blood

Dermatology

Gastrointestinal

Genitourinary, renal & gynecology

Infectious & toxicology

Metabolism & endocrine

Neurology & psychiatry

Oncology

Ophthalmology & otorhinolaryngology

Orthopedics, dental, anesthesia & surgery

Pulmonary & respiratory

Rheumatoid & autoimmune

Predefined Targets of the Scroll Down Menu:

Erythropoietin (EPO) & Erythropoiesis Stimulating Agents (ESA)

G-CSF & GM-CSF

Thrombopoietin & Thrombopoiesis Stimulating Agents

Interferon

Insulin

Coagulation Factor

Human Growth Hormone (hGH)

FSH etc

Thrombolytics & Fibrinolytics

Enzyme Replacement & Enhancement Therapies

Growth Factors
