Date: October 2011

Pages: 274

Price: US\$ 1,333.00 (Single User License)

ID: VD147A583DEEN

Abstracts

Subscription to La Merie's proprietary Vaccine Pipeline Database provides online access to more than 1,200 project entries for prophylactic and therapeutic vaccines on the market and in research & development. Each project is specified for its Target or Mechanism of Action, Therapeutic Area and R&D Phase. Use of the R&D database of vaccines is intuitive. Data sets of interest can be printed and exported. Projects are being updated continuously. The R&D history of each project with online references of information sources can be viewed and printed. The projects can be segmented into Territories, Therapeutic Areas and R&D Phases. An advanced search function allows to combine search parameters. A scroll down menu for predefined targets conveniently selects projects of interest. By clicking on column heads of the project list, projects can be arranged in ascending or descending alphabetical or numerical order, e.g. for phase, product category or company name. Sample screenshots illustrate the database.

Purchase of the subscription provides a 1-year online access to the data of the Antibody Pipeline Database. Credentials to access the database will be sent by e-mail within 24 hours after purchase.

Benefits from the Antibody Pipeline Database:

New database (since 2008) with no historical burden

Intuitive use

Designed for structured searches

Focused on targets, therapeutic areas and R&D phases

Ideal for competitor analysis (companies, targets, product categories)

Cost-effective and rapid solution for benchmarking

Identification of licensing candidates

Project listing in a tabular format:

Drug Codes

Target / Mechanism of Action

Class of Compound

Product Category

Company

Territory

Therapeutic Area

Indication

R&D Phase

Therapeutic Areas:

Cardiovascular & blood

Dermatology

Gastrointestinal

Genitourinary, renal & gynecology

Infectious & toxicology

Metabolism & endocrine

Neurology & psychiatry

Oncology

Ophthalmology & otorhinolaryngology

Orthopedics, dental, anesthesia & surgery

Pulmonary & respiratory

Rheumatoid & autoimmune

Examples of Predefined Targets of the Scroll Down Menu:

Hepatitis Vaccines

Influenza Vaccines

Herpes Virus Vaccines

Staphylococcal Aureus Vaccines

Streptococcal Vaccines

Pseudomonas Aeruginosa Vaccines

Cytomegalovirus (CMV) Vaccines

Tuberculosis Vaccines

Anthrax Vaccines

Respiratory Syncytial Virus (RSV) Vaccines

Human Papilloma Virus (HPV) Vaccines

Malaria Vaccines

Dengue Virus Vaccines

Human Immunodeficiency Virus (HIV) Vaccines

Therapeutic Cancer Vaccines
