Abstracts

Spain oil storage industry report is a complete study focusing on oil, chemicals and petroleum products storage infrastructure, demand and near to long term future of Spain market.

Demand for both crude oil and refined products is witnessing strong growth across Spain. In particular, with fluctuations in oil and product prices, countries are developing adequate storage facilities. In addition, government is also assessing strategic petroleum reserves and supply options. Surge in economic activity and growth in construction and transportation demand are driving demand for petroleum products in the country. New storage construction activities are also likely to witness significant progress over the near term future.

New petroleum product consumption mix is emerging in Spain, forcing traders and refiners to equip adequate storage facilities for uninterrupted and efficient supply chain system. In this context, the leading industry publisher has released its 10th version of "Spain Long-term Oil Storage outlook report", offering analysis on Spain midstream oil and gas markets. The Spain oil storage report provides detailed insights into emerging market trends, new dynamics, shifting strategies and the future role of Spain in global and regional storage markets.

The Spain report is a comprehensive research work covering details of Spain storage infrastructure, key operators, production, consumption and trading of major petroleum
