Abstracts

During 2017 and 2018, an increase in investor confidence was observed across most LNG markets including Taiwan. Planned projects witness considerable progress with increase in LNG supply volumes anticipated over the short term future. Further, surplus LNG availability, low prices and strong outlook for gas based applications worldwide are spurring interest in Taiwan and global LNG markets. The global LNG trade in 2017 witnessed strong growth rates after 2009 to 292.5 million tonnes. Both new liquefaction and regasification capacities are coming online after couple of stagnant years. Further, the market is expected to be buyer oriented at least till 2022, providing strong opportunities for active and upcoming regasification markets.

After period of delays, Taiwan companies are formulating long term strategies to develop required infrastructure in global LNG market. In this context, the leading industry publisher has released its 12th version of "Taiwan Long-term LNG outlook report", offering analysis across entire Taiwan LNG value chain. The Taiwan LNG report provides detailed insights into emerging market trends, new dynamics, shifting strategies and the new role of Taiwan in global and regional scale.

The report is a complete research work covering details of Taiwan LNG consumption patterns, key importers, volumes and values, industry revenues, current and planned infrastructure details and competitive scenario. The Taiwan research work also presents detailed outlook of Taiwan LNG demand, contracts, together with trends and challenges of investing in Taiwan market. In addition, data on LNG terminals, storage facilities, LNG fleet, fields, trade movements, prices along with an illustrative map is also provided. Further, demographic, economic outlook of Taiwan together with latest LNG industry developments are covered in detail.
