Agricultural Films is plastic film used in agricultural production in general. Agricultural films provide a wide range of benefits such as reducing erosion and soil compaction, providing nutrients, increasing soil temperature, supporting seed germination, suppressing the growth of weeds, and protecting against UV rays. The Agricultural Film industry concentration is not high; there are many manufacturers in the world, and high-end products mainly from Americas and Europe. In the world wide, giant manufactures mainly distribute in America, Europe and China. The world leading Agricultural Film production mainly distribute in China and Americas areas. China is the main manufacturing country in the world. For after decades of development, the number of firms in China has been increasing from the first of several to the current more than thousand in which there are more and more sizable companies. They are mainly distributed in Shandong, Gansu, Sichuan and Xinjiang areas in which Agricultural industry is prosperous and developed. The Agricultural Film produced in the north of China and the high-end products are much less.

Over the next five years, LPI(LP Information) projects that Agricultural Films will register a 10.6% CAGR in terms of revenue, reach US\$ 16900 million by 2023, from US\$ 9230 million in 2017.
