A buzzer or beeper is an audio signalling device, which may be mechanical, electromechanical, or piezoelectric. Typical uses of buzzers and beepers include alarm devices, timers and confirmation of user input such as a mouse click or keystroke. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties for Buzzer industry. Attracted by the market profits, more and more companies have entered into Buzzer industry, the competition between manufacturers at home and abroad is fierce for the time being.

Buzzer demand has a certain space, but basically showing the scarcity of high-end products due to technology barrier and excess capacity of low-end products. There is increasing demand for high-end products.

Despite the presence of competition problems, due to the clear global economy recovery trend and industry profits, investors are still optimistic about this area; there will be more investments to enter the field.

Over the next five years, LPI(LP Information) projects that Buzzer will register a 5.6% CAGR in terms of revenue, reach US\$ 670 million by 2023, from US\$ 480 million in 2017.
