Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Electric Submeter is usually an electronic device that records consumption of electric, water, gas, heat energy in intervals of an hour or less and communicates that information at least daily back to the utility for monitoring and billing. It enables two-way communication between the meter and the central system. Unlike home energy monitors, it can gather data for remote reporting.

Global giant manufactures mainly distributed in U.S. and E.U. The leading global players include Landis+Gyr (based in Switzerland but owned by Toshiba Corp. of Japan), GE Digital Energy (United States), Itron (United States), Aclara (United States), Honeywell (Elster Group and E-Mon), Sensus (United States) and Holley Metering (China).

The key consumption markets locate at APAC, which take a market share of about one half. North America takes the market share of 18.13%, followed by Europe with 17.66%. Asia Pacific's consumption market has a fast growing speed.

We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a relatively strong curve due to the replacement of utility meters.

Over the next five years, LPI(LP Information) projects that Electric Submeter will register a 4.8% CAGR in terms of revenue, reach US\$ 9450 million by 2023, from US\$ 7130 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
