A basic EAC system consists of a reader, a controller, and an electric lock. Electronic access control is a security solution that gives you detailed control over the physical security of your business. Electronic access control systems allow you to restrict access to your facility based on guidelines you define. Limitations can be set on who, where and when.

The Electronic Access Control Systems industry has got a rapid development during the last few years, with the fast development of technology and research. The global total revenue of Electronic Access Control Systems is 14298.79 M USD in 2016. At the same time, as the development of the society and economy, more and more attention has been emphasis on importance of residential and commercial security, and more and more Electronic Access Control Systems has been used in big companies.

In the past few years, as the main raw material price was relatively stable, with the addition of a sharp increase in production capacity, expected that the Electronic Access Control Systems raw material price will be stable in the short term. However, the improvement of energy, transportation costs, and employee wages, will play a significant role in promoting the cost of Electronic Access Control Systems.

China is an important consumer of Electronic Access Control Systems; as the same time, the consumption of Electronic Access Control Systems in China grown gradually. But the backward technology and research limit the development of Electronic Access Control Systems. In the result, Electronic Access Control Systems in China was occupied by some foreign brands to some degree, such as Honeywell, ASSA Abloy, SIEMENS, TYCO, BOSCH Security, DDS.

Over the next five years, LPI(LP Information) projects that Electronic Access Control Systems will register a 11.3% CAGR in terms of revenue, reach US\$ 31200 million by 2023, from US\$ 16400 million in 2017.
