Electronic Potting and Encapsulation delivers a thicker and more robust solution versus conformal coating to protect electronic assemblies from harsher environments to keep them functioning properly for longer lengths of time, and/or to keep them protected from security threats. Electronic Potting and Encapsulation also create a barrier against moisture, dust, fungus and corrosion. These processes also enhance circuit reliability by eliminating leakage from high voltage circuits.

At present, in the foreign industrial developed countries the Electronic Potting & Encapsulating industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the Europe and USA. Meanwhile, foreign companies have more mature equipment, strong R & D capability, and the technical level is also in a leading position. But in foreign companies the manufacturing cost is relatively high, compared with in China. So the manufacturing cost in developed countries is a disadvantage. As the production technology of Electronic Potting & Encapsulating manufacturers in China continues to improve, the share of Chinese manufactures will be increasing, and the competitiveness in the international market will also gradually increase.

Currently China has become international Electronic Potting & Encapsulating large consumption country, but the production technology is relatively laggard, the manufacturers can only produce some low-end product, although after 2010 the new production lines is expanding, the technology is still relying on import.

The Electronic Potting & Encapsulating is mainly used in the electronics industry. As the electronics industry develops, there is a growing demand to increase the package

performance. Along with this, performance and quality requirements for Electronic Potting & Encapsulating have become more demanding.

Over the next five years, LPI(LP Information) projects that Electronic Potting & Encapsulating will register a 11.1% CAGR in terms of revenue, reach US\$ 2200 million by 2023, from US\$ 1170 million in 2017.
