The report requires updating with new data and is sent in 48 hours after order is placed.

Personal protective equipment includes head, eye and face protection, hearing protection, protective clothing, respiratory protection, professional footwear, fall protection, hand protection and others. Apart from this, personal protective equipment also finds application across various industries including construction, manufacturing, oil and gas, chemicals, food, pharmaceuticals, transportation and others. The others segment include government usage, unorganized sector, small-scale manufacturing utilities and service stations among others.

GIR predicted that the global personal protective equipment (PPE) market will grow steadily at a CAGR of 6% to 54.3 billion USD by the end of 2022. The construction market in APAC is expected to outperform the global market, and will be one of the major factors fuelling the growth of the market in the coming years.

Manufacturing was the largest end-use segment in 2016 accounting for over 32.5% of global market, and is projected to remain the dominant segment over next eight years. PPE demand in transportation is anticipated to grow at a CAGR of 8% over the next 6 years. Growing transportation sector in emerging economies such as India and China coupled with rising workforce capacities is expected to augment product demand in future on account avoiding overhead costs such as compensation.

Over the next five years, LPI(LP Information) projects that Personal Protective Equipment (PPE) will register a 6.1% CAGR in terms of revenue, reach US\$ 57600 million by 2023, from US\$ 40400 million in 2017.
