## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A trencher is a piece of construction equipment used to dig trenches, especially for laying pipes or cables, for installing drainage, or in preparation for trench warfare.

Trenchers may range in size from walk-behind models, to attachments for a skid loader or tractor, to very heavy tracked heavy equipment.

First, the trencher industry concentration is high. North America is the biggest producer and consumer of trencher. There are no more than fifty manufacturers in the world, and high-end products mainly come from USA and European.

In the world wide, giant manufactures mainly distribute in Europe and America.

American and Europe has a long history and unshakable status in this industry, like Ditch Witch, Vermeer and Tesmec. They have perfect products.

Second, the import and export percent of this industry is high. Also, some foreign companies are willing to set plants in China due to its low labor price and more opportunities.

Over the next five years, LPI(LP Information) projects that Trencher will register a 1.3% CAGR in terms of revenue, reach US\$ 49 million by 2023, from US\$ 45 million in 2017.

This report studies the global market, especially in North America, Europe, Asia-Pacific, South America, Middle East and Africa, focuses on the top 5 players in each region, with sales, price, revenue and market share from 2013 to 2018, the top players:
