Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global 3D NAND Flash market for 2018-2023.

3D NAND flash memory is no longer a simple planar memory stack. This is just one of them, as well as VC vertical channels and VG vertical gates. 3D NAND flash memory has SLC, MLC and TLC types

In 3D NAND flash memory, manufacturers do not necessarily announce a lot of technical details. In particular, there is little mention of specific process technologies. 3D NAND flash memory of other vendors except Samsung is only now coming to market, and representative products are not enough.

Over the next five years, LPI(LP Information) projects that 3D NAND Flash will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of 3D NAND Flash market by product type, application, key manufacturers and key regions.

To calculate the market size, LP Information considers value and volume generated from the sales of the following segments:
