## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global AC Motor market for 2018-2023.

AC Motors is an electric motor driven by alternating current (AC). The AC Motor commonly consists of two basic parts, an outside stationary stator having coils supplied with alternating current to produce a rotating magnetic field, called “stator”; and an inside rotor attached to the output shaft producing a second rotating magnetic field and output kinetic energy, namely “rotor”. In this report we mainly talk about the AC Motors power is larger than 1HP.

First, the AC Motor industry concentration is relatively not high; the high-end products mainly from America and western European. ABB and Siemens have a long history and unshakable status in this industry with perfect products in the Europe. As to the USA, the Regal Beloit has become a regional leader. In Asia, it is TMEIC that leads the technology development.

Second, all manufactures in the world are committed to the improvement of product. These two years, some Chinese manufactures can almost catch up with the world's leading technology too.

Over the next five years, LPI(LP Information) projects that AC Motor will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of AC Motor market by product type, application, key manufacturers and key regions.
