In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Addiction Treatment market for 2018-2023. Drug addiction is a chronic, recurrent disease characterized by the uncontrolled application of an addictive drug. In recent years, the abuse of exogenous opioids (such as morphine and heroin) has become a serious social problem. It does not care about the physical and mental health of the abuser himself. It also has disastrous consequences for families and society. Opioid withdrawal is extremely difficult once it is abused.

Drug addiction is a chronic, recurrent brain disease that seriously damages health and causes enormous social problems. Relapse is one of the main characteristics of drug addiction, and it is also the main problem to be solved in the treatment of drug addiction. The high relapse rate is the biggest challenge facing drug addiction medicine.

Over the next five years, LPI(LP Information) projects that Addiction Treatment will register a 6.0% CAGR in terms of revenue, reach US\$ 5020 million by 2023, from US\$ 3540 million in 2017.
