The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Aerobridge market for 2018-2023.

Aerobridge is an enclosed, movable bridge which connects the airport terminal to aircraft parked there, so passengers can move directly to and from the plane without having to step out onto the tarmac.

Increasing passenger traffic at domestic as well as international airports is expected to drive the market. Moreover, increasing investments in installing operating aerobridges for domestic flights and rise in passenger in tier-II cities of developing countries are also expected to drive the market. However, lack of technical knowledge in handling the aerobridge causing accidents may limit the growth of the market.

Over the next five years, LPI(LP Information) projects that Aerobridge will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
