The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Aftermarket Tire Pressure Monitoring System (TPMS) market for 2018-2023.

A tire pressure monitoring system (TPMS) is an electronic system designed to monitor the air pressure inside the pneumatic tires on various types of vehicles. TPMS report real-time tire-pressure information to the driver of the vehicle, either via a gauge, a pictogram display, or a simple low-pressure warning light.

Due to the fast development of vehicles industry in China, global major manufacturers of TPMS have invested more resources and attention in China market. Currently the Chinese OEM market is strongly controlled by foreign companies such as Schrader, Pacific Industrial, Continental, TRW, etc. But according to our investigation, in the AM market, these companies have not yet pay more attention, the AM market is primarily competed by Chinese domestic manufacturers.

Along with South Korea, European Union, and Taiwan joined the camp that forces the installation of TPMS in 2014, and China compiled its first technical standard for passenger vehicle TPMS in Mar 2015, we expect that the official policy to force the installation of TPMS will come in short future.

Over the next five years, LPI(LP Information) projects that Aftermarket Tire Pressure Monitoring System (TPMS) will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
