In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Air Compressors market for 2018-2023.

Air Compressor is a device that converts power (usually from an electric motor, a diesel engine or a gasoline engine) into kinetic energy by compressing and pressurizing air. The energy in the compressed air can be stored while the air remains pressurized. The energy can be used for a variety of applications, usually by utilizing the kinetic energy of the air as it is depressurized.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Air Compressor industry in short supply on the market in the past few years, more and more companies enter into Air Compressor industry, the current demand for Air Compressor product is relatively low, lack of demand, excess supply. Ordinary Air Compressor products on the market do not sell well, Air Compressor's price is lower than past years. The signal of market price change indicates the trend in the Air Compressor industry, low-end product has excess capacity, and high-end product is in short supply.

Air Compressor product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials.

Each of the Air Compressors manufacturers has its own mature sales networks. Through retail stores, their authorized distributors or their partners, those Air

Compressors manufacturers keep keen on expanding their Air Compressors sales. To achieve better sales businesses, Air Compressors manufacturers usually invest on their marketing channel infrastructure every year.

Over the next five years, LPI(LP Information) projects that Air Compressors will register a 3.0% CAGR in terms of revenue, reach US\$ 18300 million by 2023, from US\$ 15300 million in 2017.
