## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Air Separation Plant market for 2018-2023.

Air Separation Plant is the equipment used in the separation of the air, which is used to produce the oxygen, nitrogen, etc.

The future market of air separation plant depends on the development of technology, demand and suppliers of air separation unit. Worldwide Installations are not performing in a high lightened way because of sluggish economy. Europe is the largest production market. China is still the fastest growing country, but the speed is expected to slow down because of economic outlook, and the government's capacity reduction policy has brought negative effect on the demand of Air Separation Plant installation.

As international economic situation is complicated, in the next few years there will be many uncertainties. Because of the support of government' policy, more companies are entering air separation plant industry.

Although sales of Air Separation Plant show a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage and downstream support, do not to enter into this industry.

Over the next five years, LPI(LP Information) projects that Air Separation Plant will register a 4.4% CAGR in terms of revenue, reach US\$ 4500 million by 2023, from US\$ 3480 million in 2017.
