In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Air Source Heat Pumps market for 2018-2023. Air Source Heat Pump (ASHP) is a device which uses a vapor compression cycle to transfer heat between outdoor air and indoor air or water. There are two type of air source heat pumps including air-to-air heat pumps and air-to-water heat pumps. As the name implies, these systems heat or cool indoor air or move energy into water. An air-source heat pump can provide efficient heating and cooling for your home, especially if you live in a warm climate. When properly installed, an air-source heat pump can deliver one-and-a-half to three times more heat energy to a home than the electrical energy it consumes. This is possible because a heat pump moves heat rather than converting it from a fuel, like in combustion heating systems.

Of the major players of Air Source Heat Pumps, Daikin Industries maintained its first place in the ranking in 2017. Daikin Industries accounted for 13.58 % of the United States Air Source Heat Pumps sales volume market share in 2017. Other players accounted for 10.95%, 7.97%, 7.90%, including Mitsubishi Electric, Panasonic and Fujitsu General.

In this study, the sales region of Air Source Heat Pumps divided into four geographic regions: In the South of the United States, total Air Source Heat Pumps accounted for 53.75%. In the West of the United States, total Air Source Heat Pumps accounted for 25.28%. The market in the Midwest of the United States accounted for 12.72 %, In the Northeast, total Air Source Heat Pumps accounted for 8.25%. Among all regions, the South of the United States is estimated to represent the highest share.

On the basis of product type, the Air-to-Air segment is projected to account for the largest sales volume share during the forecast period; this segment was estimated to

account for 53.93 % sales volume share in 2017.

Over the next five years, LPI(LP Information) projects that Air Source Heat Pumps will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
