## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Alloy Tubes market for 2018-2023.

Alloy pipe is a kind of seamless steel pipe, its performance is much higher than that of general seamless steel pipe, because this type of steel pipe contains more Cr, its high temperature resistance, low temperature resistance, corrosion resistance performance is other Steel pipe can not match, so the alloy pipe is widely used in petroleum, aerospace, chemical, electric power, boiler, military and other industries.

Alloy tubes are classified on the basis of the metals into aluminum alloys tubes; copper alloys tubes, nickel alloy tubes, and stainless steel tubes. Nickel tubes are excellent corrosion resistant in both aqueous and high-temperature conditions. Aluminum tubes are also corrosion resistant; however they have less strength on account of which they are used in outdoor structural applications such as trims and railings. Copper Alloys are used extensively in medical industries, fire safety, and domestic industry. Main manufacturers of alloy tubes in the market are Jiangsu Chengde Steel Tube Share Co. Ltd., Salzgitter Mannesmann Stainless Tubes, Plymouth Tube Company, ISMT Limited, Continental Steel & Tubes Company and Aesteiron Steels Private Limited.

Over the next five years, LPI(LP Information) projects that Alloy Tubes will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
