Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global American Football Helmet market for 2018-2023.

American Football Helmets is a piece of protective equipment used mainly in American football and Canadian football. It consists of a hard-plastic shell with thick padding on the inside, a face mask made of one or more plastic-coated metal bars, and a chinstrap. Each position has a different type of face mask to balance protection and visibility, and some players add polycarbonate visors to their helmets, which are used to protect their eyes from glare and impacts. Helmets are a requirement at all levels of organized football, except for non-tackle variations such as flag football. Although they are protective, players can and do still suffer head injuries such as concussions.

There are three kinds of American Football Helmets: youth American Football Helmets and adult American Football Helmets. Report data showed that 81.86% of the American Football Helmets market demand in middle school (10-14 years old) and high school (15-18 years old), 18.24% in adult American Football Helmets is sold to America football adult player (both amateur player and profession player) in 2017.

Market competition is very intense. Riddell, Schutt, Xenith and VICIS, SG Helmets are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry.

Over the next five years, LPI(LP Information) projects that American Football Helmet will register a 1.2% CAGR in terms of revenue, reach US\$ 150 million by 2023, from US\$ 140 million in 2017.
