In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Analyzer for Particle Counters market for 2018-2023.

A particle counter is a sophisticated monitoring instrument that counts the amount of particulate contamination. It can be used to detect contaminants from the air, a surface or a liquid. Some examples of these particles can be anything from oil, metal shavings, dust, smoke, ash, mold, or other biological contaminants.

As an important and necessary instrument for the maintenance of cleanroom, achievement of ultra-pure water or ultra-pure oil for some specific R&D or production requirements, the demand of particle counters is growing year by year. In 2011, the global sales volume of particle counter was about 22.6 thousand units. By the end of 2015, the sales volume of particle counter worldwide reached about 25.6 thousand units, which brought in with industry revenue about 190 million USD.

Currently, there are more than 30 manufacturers of particle counters worldwide. But the market is still concentrated, as the technology of particle counters is hold by not many enterprises. In fact, the top five manufacturers, such as Particle Measuring Systems, Lighthouse Worldwide Solutions, Rion, HCT Instruments and Beckman Coulter accounts for 60% of the industry total revenue.

Europe, USA and Japan have been the market developers of particle counters for years; and the market in the three regions still hold the majority market share of particle

counters. But market in developing countries is developing fast, and market in these regions is regarded as the development engine for the future market of particle counters.

Over the next five years, LPI(LP Information) projects that Analyzer for Particle Counters will register a 2.0% CAGR in terms of revenue, reach US\$ 220 million by 2023, from US\$ 200 million in 2017.
