Anti-reflective glass is a type of glass, which is designed to reduce the amount of surface reflection seen from the face of the glass.

The visual reflectance in the normal clear glazing can be diminished, therefore the glass can exhibit a near invisible finish for glass installation

Anti-reflective glass is made from low iron glass which is dipped in multiple solutions of metallic oxides. These solutions create a coating on all the faces of the glass, thereby preventing visual reflectance.

Over the next five years, LPI(LP Information) projects that Anti-Reflective Glass will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
