The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Aromatic and Aliphatic Solvents market for 2018-2023.

Aliphatics can be cyclic, but only aromatic compounds contain an especially stable ring of atoms, such as benzene. Aliphatic compounds can be saturated, like hexane, or unsaturated, like hexene and hexyne. Open-chain compounds (whether straight or branched) contain no rings of any type, and are thus aliphatic.

Aromatic and aliphatic solvents are hydrocarbon solvents. Aromatic solvents have a ring structure similar to benzene and they are manufactured by distilling coal tar or petroleum. The processes such as catalytic hydrogenation & alkylation and catalytic reforming & steam cracking are also utilized for the production of aromatic solvents. Benzene, diethyl benzene, phenol, toluene, and xylene are some of the major aromatic solvents.

Aromatic solvents find application in industries such as adhesives, cleaners, oilfield chemicals, paints, pharmaceuticals, printing inks, textiles, and varnish. Aromatic solvents also find application as chemical intermediates, corrosion inhibitors, degreasers, diluents, and extractors.

Aromatic solvents have very high solvency rates and it helps in formation of homogenous solutions. It finds application as an agent for speeding up the drying process of lacquer based paints. Toluene has the major share of demand among the aromatic solvents. Aliphatic solvents possess a straight-chain structure of paraffinic compounds. Heptane, hexane, gasoline, kerosene, lacquer diluents, mineral spirits, and naphtha are some of the major aliphatic solvents. Aliphatic solvents find applications as

herbicides, fungicides, insecticides and some others. Aliphatic solvents are comparatively less harmful than aromatic solvents.

Over the next five years, LPI(LP Information) projects that Aromatic and Aliphatic Solvents will register a 2.7% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
