In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Athletic Footwear market for 2018-2023. Athletic Footwear is designed and manufactured according to the sports characteristics of the people to participate in. The soles of the Athletic Footwear are different with the ordinary shoes, which can play a buffer role to prevent the injuring. Therefore, the performance of Athletic Footwear soles and uppers material determines the ability of its injury prevention. In the production of the Athletic Footwear, raw materials, production processes have determined the quality of Athletic Footwear.

As global overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Athletic Footwear industry in continuous demand growth on the market in the past few years, more and more companies enter into Athletic Footwear industry, the current demand for Athletic Footwear product is relatively low, lack of demand, excess supply. Low quality Athletic Footwear products on the market do not sell well; Athletic Footwear's price is lower than past years. The signal of market price change indicates the trend in the Athletic Footwear industry, low-end product has excess capacity, high-end product is in short supply.

With more and more enterprise entering the Athletic Footwear industry, the competition is fierce; people pay more attention on the quality of the Athletic Footwear, therefore, the material development of the Athletic Footwear is the opportunity for the Athletic Footwear brand.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field.
