Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global ATVs+2/3 Wheeler market for 2018-2023.

An all-terrain vehicle (ATV), also known as a quad, quad bike, three-wheeler, four-wheeler or quadricycle as defined by the American National Standards Institute (ANSI) is a vehicle that travels on low-pressure tires, with a seat that is straddled by the operator, along with handlebars for steering control. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles. Although it is a street-legal vehicle in some countries, it is not street-legal within most states and provinces of Australia, the United States or Canada.

India, the most important two and three wheeler market, has overtaken China to emerge as the world's biggest market for two-wheelers continued its growth trend in 2016. The massive government spending in rural programmes and large road-construction projects is leading to a pick-up in volumes in smaller towns and villages.

The market in China has been on a decline over the past few years, perhaps due to the fast-paced growth in car sales there as well as the curbs on petrol two-wheelers in top cities. China instead recorded decreasing volumes in 2016, down by 12% compared to the previous year and ending the period with nearly 16.8 million units production. The China domestic two and three wheeler industry will continue to face rising labor costs, lower market demand, more stringent price competition between enterprises. Overall, the domestic part of the city's ban on two wheeler policy will limit the consumption of the domestic motorcycle industry, but the devaluation of the renminbi and the export tax rebate rate of the motorcycle exports have played a positive impact, the motorcycle industry is entering a slow adjustment period. We forecast that China two and three

wheeler market will keep a -3.87% CAGR decrease in 2016-2023F. Over the next five years, LPI(LP Information) projects that ATVs+2/3 Wheeler will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
