In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automatic Tire Inflation System market for 2018-2023.

Automatic tire inflation systems (ATIS) work to overcome one or more of the causes of tire underinflation by monitoring tire inflation pressure relative to a pre-set target and re-inflating tires whenever the detected pressure is below the target level. The tire inflation system not only increases vehicle mobility and reliability when moving, it also helps to ensure that a need for vehicle recoveries is avoided as far as possible. It also prevents unnecessary damage to fields. Moreover, simple adjustments to correct the air pressure ultimately reduce tire wear.

On the basis of type, the automatic tire inflation system market is segmented into tractors, trucks, trailers, and others. The trucks segment is expected to account for the larger share of the global market in 2017.

End-users, included in this market are military, commercial, agriculture usage. The military application account for the largest share of the global market in 2017.

Based on regions, the global automatic tire inflation system market is segmented into North America, Europe, Asia-Pacific, South America, Middle East and Africa. North America is expected to maintain the leading share during the forecast period.
