In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automation in Automotive market for 2018-2023.

The global automation market in the automotive industry is a contributing segment of the global industrial automation software market. Industrial automation software includes human-machine interface (HMI), manufacturing execution system (MES), programmable logical controller (PLC), distributed control system (DCS), and supervisory control and data acquisition (SCADA). Industrial automation software is widely used in the oil and gas, power, automotive, food and beverage, pharmaceutical, chemical, aerospace and defense, and electrical and electronics industries.

One trend in the market is emergence of smart manufacturing. The adoption of smart manufacturing enables industrial advances with the help of advanced computing, analytics, low-cost sensing, and new levels of connectivity enabled by the Internet. The major objectives of smart manufacturing are flow optimization and customization, asset tracking, predictive maintenance, and real-time inventory optimization.”

According to the report, one driver in the market is rising technological advances in PLC leading to growth of PAC market. PLC is one of the key solutions offered by any automation solutions vendor. It has been widely adopted across all the industries worldwide for 40 years. Although the PAC market is on the verge of maturity, recent advances such as PACs are supporting the market in terms of operability. PACs are advanced versions of PLCs and provide greater interoperability, flexibility in programming, and large memory capacity. A PAC is basically a PC merged with PLC to automate control of the equipment. PAC's hardware architecture and software are designed to be more user- friendly to the IT/computer programmer

Over the next five years, LPI(LP Information) projects that Automation in Automotive will register a 8.6% CAGR in terms of revenue, reach US\$ 13800 million by 2023, from US\$ 9130 million in 2017.
