In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Oil Seal market for 2018-2023. Automotive oil seal is an important sealing product that is used to block gaps in automotive components to prevent the leakage of lubricants. In addition, it protect automotive components from dust, sand and foreign objects.

Automotive oil is a small but indispensable functional component used in vehicles. It is made of many different materials, while nitrile -butadiene rubber (NBR) is one of the most commonly used materials. Averagely, there may be 25 oil seals are used in a vehicle according to the automotive components.

In the last several years, the development of Japan automotive oil seal industry is relatively stable with an average growth rate of 3.25%. In 2015, the Japan capacity of automotive oil seal is about 479 million and the actual production is expected to be more than 400 million units.

Japan is an important supplier of automotive oil seal in the global. The rising of automotive oil seal has close relationship with the automotive industry, which brings a hotbed for the development of automotive oil seal. Most giant manufacturers of automotive oil seal have cooperation with these automotive manufacturers like Toyota. Besides meet the domestic demand for automotive oil seal, manufacturers can also exported little amount products to abroad, especially to China, which is one of the largest consumption market of automotive oil seal. In recent years, the fast development of China automotive industry also brought a chance for Japan automotive oil seal industry.

Over the next five years, LPI(LP Information) projects that Automotive Oil Seal will

register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
