The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Active Body Panel market for 2018-2023.

The increase in number of road accidents as one of the primary factors that will trigger the growth of the automotive active body panel market in the coming years. With the advent of new technologies, products, and solutions, the automotive industry is rapidly evolving. Road accidents are the primary reason for the growing development of advanced safety technologies and solutions. It has been observed that millions of people die on the road every year due to on-road collisions across the world. Rising traffic deaths and fatality rates have compelled the government to issue strict automotive safety norms. The basic safety systems have been enhanced by integrating frontal airbags, anti-lock braking system (ABS), or electronic brakeforce distribution (EBD).

The development of energy-storing body panels is one of the key trends in the automotive active body panel market. With the advent of automotive electronics, all-electric cars are being developed as a promising alternative to the internal combustion engine (ICE) driven vehicles. Lithium-ion battery used in electric vehicles poses several disadvantages. To fix this problem, the automakers are focusing on developing technologies that can be a better alternative to EV batteries. This has led to the development of body panels that can store energy and act as a charger for electric vehicles.

The automotive active body panel market is highly concentrated due to the presence of few established players. This industry research report provides an in-depth analysis of the competitive environment in the lightweight automotive body panels market among

the leading vendors. Moreover, our analysts also provide key areas that the vendors should focus on to sustain the competitive environment and gain maximum market share.
