In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Air-condition Compressor (Automotive Air-conditioning Compressor) market for 2018-2023.

Automotive air conditioning compressor is the heart of automotive air conditioning system, plays a refrigerant vapor compression and transport role.

The sales of automotive air-condition compressor are also related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of automotive air-condition compressor industry may not keep that stable. But it is surely forecasted that the market of automotive air-condition compressor is still promising.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

With emerging economies growing faster, a strategy has been adopted by most leading vendors in the automotive air-condition compressor market to approach these areas. Vendors recognize the importance of emerging market, particularly in China, and are working towards penetrating this market by strengthening their sales and distribution networks.

Over the next five years, LPI(LP Information) projects that Automotive Air-condition Compressor (Automotive Air-conditioning Compressor) will register a 2.3% CAGR in

terms of revenue, reach US\$ 11100 million by 2023, from US\$ 9660 million in 2017.
