The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Body Stampings market for 2018-2023.

Stamping (also known as pressing) is the process of placing flat sheet metal in either blank or coil form into a stamping press where a tool and die surface forms the metal into a net shape. Stamping includes a variety of sheet-metal forming manufacturing processes, such as punching using a machine press or stamping press, blanking, embossing, bending, flanging, and coining. This could be a single stage operation where every stroke of the press produces the desired form on the sheet metal part, or could occur through a series of stages. The process is usually carried out on sheet metal, but can also be used on other materials, such as polystyrene.

The stamping process plays a major role in determining the efficiency of automotive body part production.

In the next few years, Automotive Body Stamping industry will maintain increasing at a relatively high growth rate. Investors are still optimistic about this area; the future will still have more new investment enter the field.

The global average price of Automotive Body Stamping is in the decreasing trend, and the average price is 2600 USD/Unit in 2017. With the situation of global economy and the investment of technology, the price will be decreasing trend in the following five years.

The classification of Automotive Body Stamping includes Carbon Steel and Aluminum. The proportion of Carbon Steel in 2017 is about 94.75%. Aluminum is cheaper than Carbon Steel, which is lighter.

Automotive Body Stamping are widely used in Passenger Vehicle and Commercial Vehicle. The more than half of Automotive Body Stamping is used in Passenger Vehicle, and the sales proportion in 2017 is about 81.7%.

China and Europe is the main consumption region, with a consumption market share nearly 29% and 23% in 2017. Other regions also enjoy the major market share in global region.

In the future, the automotive Body Stamping will have a good future; the price fluctuation has relationship with the raw material. The technology will more mature and the monopoly phenomenon will be weakening.

Over the next five years, LPI(LP Information) projects that Automotive Body Stampings will register a 3.5% CAGR in terms of revenue, reach US\$ 315100 million by 2023, from US\$ 256800 million in 2017.
