The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Cabin Air Filter market for 2018-2023.

Automotive Cabin Air Filter is usually folded paper or some combination of paper and fibers. They are often rectangular or nearly square in shape and are simply a physical barrier to trap dust, pollen, leaves and other debris, reducing the flow of chemically contaminated air that makes it into the ventilation and air conditioning system. The particles accumulate on the surface of the filter and eventually cake up, forming their own layer, restricting the flow of incoming air. To keep the air clean in the cabin, these filters are intended to be discarded at least annually.

For industry structure analysis, the Automotive Cabin Air Filter industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 40.77% of the revenue market. Regionally, East China is the biggest production area of valves, also the leader in the whole industry.

East China occupied 45.56% of the production market in 2015. It is followed by North China and Central South China, which respectively have around 14.93% and 14.11% of the China total industry. Other regions have a small amount of production.

Geographically, East China was the largest consumption market in China, which took about 30.20% of the China consumption volume in 2015. North China shared 27.39% of total.

For price trend analysis, a key variable in the performance of Automotive Cabin Air Filter producers is raw material costs, specifically the speed at which any increase can

be passed through to customers.

Over the next five years, LPI(LP Information) projects that Automotive Cabin Air Filter will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
